

NESTOR B. SAYSON JR.

Front-End Developer | Libon, Albay

EXPERIENCE

Intelliseven Technology Solutions Inc.

Quezon City, Philippines

Front-End Developer Intern March 2025 – June 2025

Developed a tablet-based Point of Sale (POS) mobile application from scratch to support efficient retail operations. Designed and implemented a responsive, user-friendly interface and handled API integration to connect with backend services. Collaborated closely with the backend developer and UI/UX designer to align design, functionality, and data flow. Actively participated in version control and team collaboration to ensure smooth development.

PROJECTS

Point of Sale System Application

Intelliseven Technology Solutions Inc.

Front-End Developer Intern

Developed a tablet-based mobile Point-of-Sale (POS) application during my internship at IntelliSeven Technology Solutions Inc. as a frontend developer, using React Native, TypeScript, Redux, and styled-components. Collaborated with a team of developers and a UI/UX designer to build the app from scratch, integrating RESTful APIs for sales, inventory, and transaction management, while utilizing Expo for efficient development, testing, and deployment.

CSPC Conversational Agent

Camarines Sur Polytechnic Colleges

Thesis Project

Developed the CSPC Conversational Agent as my undergraduate thesis project at Camarines Sur Polytechnic Colleges, serving as the lead programmer. The system leverages Retrieval-Augmented Generation (RAG) with a fine-tuned LLaMA 3 model, semantic search using vector embeddings, and Chroma vector database to deliver accurate, context-aware responses about CSPC's Citizen's Charter. This project showcases expertise in NLP, machine learning, and AI-driven information retrieval, applied to create a user-friendly, multi-turn conversational agent for institutional services.

EDUCATION

Camarines Sur Polytechnic Colleges

BS in Computer Science, 2021 – 2025

GWA: 1.31 / 1.00

SKILLS

Languages: Python, Java, C++, JavaScript, TypeScript, HTML5, CSS3

Technologies: React.js, React Native, Next.js, Node.js, Vite, Redux, styled-components, Bootstrap, Tailwind, Postman

Machine Learning & AI: RAG, Hugging Face, LangChain, Pandas, NumPy, Matplotlib, Scikit-learn

Other Tools: Git, Github, MySQL, Figma, Canva, Streamlit

ACHIEVEMENTS

ICPC Asia Manila Regional Contest – Participant (December 15–16, 2022)

- Represented CSPC in an international programming competition at Ateneo de Manila University, solving advanced algorithmic and computational problems under time constraints.
- Strengthened teamwork, strategic thinking, and problem-solving skills through collaboration in a three-member team in a high-pressure environment.

2022 Programming Contest – 9th Place (November 14, 2022)

- Achieved 9th place out of 32 participants in CSPC's annual programming contest by solving time-bound algorithmic challenges.
- Demonstrated strong logical reasoning, coding efficiency, and adaptability in competitive programming tasks.
